Photographs at the Center of Southwest Studies, Fort Lewis College: a list, sorted by title

This is a 683-page list of 15,025 photographs that the Center has cataloged at the item level. The Center has approximately a quarter of a million photographs, most of which are described at the collection or series level rather than at the level of the actual photograph. The numbers after the date field in this report are the photoprint call number and/or the photonegative call number (if one of these is missing, the Center does not have a photoprint, or a negative, as the case may be).

The Center's in-house database contains much more detail regarding each of the fifteen thousand cataloged photographs; consult the [Archivist](#) for further assistance and to request copies. For information about requesting image duplication, please use the Center's [Image Duplication Request Form](#).

by Todd Ellison, Certified Archivist
